

# Fittings

## Overview

### General Hydraulics

The crimped fittings range is composed of more than 6000 references meeting the most common international standards and specific requirements set by important OEMs. It is fully compatible with our hoses and engineered with high safety factor and eco-friendly zinc plating treatment.

Manuli fittings range is composed by MF2000, MF3000 and smart connectors: Easy Fit, Fast-Fit, Rotofit.

#### MF2000 and MF3000:

Manuli provides a two-piece solution (MF2000) and a one-piece solution (MF3000).

**MF2000** range matches all the insert types with a wide range of termination ends thus defining more than 4000 references:

- **MULTIFIT (MF)**

Manuli Hydraulics universal solution for wire spiral and braid hoses, which offers a simple and cost effective solution aimed at reducing production, distribution and assembling costs

- **MINIFIT (MT)**

Extremely compact fittings for braided hose, DN6 and DN10

- **INTERLOCK PLUS (ILP)**

This solution guarantees maximum reliability for very high pressure wire spiral hoses in heavy-duty applications

- **INTERLOCK SUPER (ILS)**

High tech swaged fittings for very large bore spiral hose

- **SPIRALFIT (SP)**

New no-skive insert for spiral hoses and large bore hose
